## Evaluation criteria

**The action chosen as the "Good Practice of the Year" should be connected to renewables. If it is clearly not, it will not be considered a good practice in this competition**

This list of criteria is meant to guide the jury in their evaluation process

### Idea/Development

- Does the action/practice make a significant contribution to advancing one or several of the areas of good practice?
- Was the submitted practice a new/innovative/creative activity/approach that nobody else has done so far/that is not part of the usual repertoire?
- Did the practice purposefully take up a commendable example from a peer?/Was that peer asked for advice?
- Does the practice have potential to be transferred to other similar settings?
- Was the practice developed in cooperation with relevant stakeholders?

### Implementation, impact and reactions from others

- Is the implementation satisfactory and does it appropriately reflect the concept?
- Does the practice have a noticeable positive impact? How?
- Do the target groups/experts confirm the effectiveness/improvement?
- Is the practice a valuable addition to existing approaches applied by the candidate organisation?
- (If there are any,) do the cooperation partners like the end-result?
- Are the stakeholder reactions mostly positive? / Are there evidences for positive external stakeholder reactions?
- Does the peer group show interest in doing the same/similar activities?

### Follow-up

- Was the activity critically evaluated during the different stages of its implementation and after its completion?
- Were the insights/findings used for a good practice exchange or is there a plan to do so?
- Were the insights/findings used to improve plans for future projects or is there a plan to do so?
