

Working Group Analysis of Costs and Benefits

RGI Workshop, 20 March 2025, Franck Dia Wagoum

Who is ENTSO-E

- ENTSO-E stands for **E**uropean **N**etwork of **T**ransmission **S**ystem **O**perators for **E**lectricity
- The association gathers 40 TSOs across Europe, spanning over 36 countries
- Our activities are driven by legal mandates defined by European Regulations, but the association also serves as forum for knowledge sharing between our members.
- Our mission is to ensure the security of the interconnected power system in all time frames at pan-European level and the optimal functioning and development of the European interconnected electricity markets, while enabling the integration of electricity generated from renewable energy sources and of emerging technologies.

Interest on climate adaptation

- Revised TEN-E asks that climate adaptation be reflected in the Cost benefit analysis methodology developed by ENTSO-E
- The topic is gaining more and more relevance for the TSOs planning, Policy makers, Regulators, investors ...
- Having all's opinions and perspectives in the development and integration of a climate adaptation indicator for the TYNDP process is essential
